

Candle Holder Homework

1. State the name of the material used for the main body of the candle holder.

2. State the name of the material used for the base of the candle holder.

3. Name two tools/pieces of equipment used to cut the strips of metal of the candle holder to size.

4. A rounded-off piece of bar is shown in the diagram below:

Describe two stages required to form the rounded end.

5. State the name given to the piece of equipment used to shape the spirals on the candle holder

6. State the name of the piece of equipment used to join the metal strips together.

7. Other than goggles, what piece of safety equipment should be worn when using this piece of equipment?

8. Paint was applied to the metal parts of the candle holder. State two ways in which the paint could be applied.

9. The metal candle part of the candle holder was joined to the wooden base using screws.

Describe two stages in joining these two parts together.
