

True Shape - Pyramids

Here we will draw the true shape of the sloping surface.

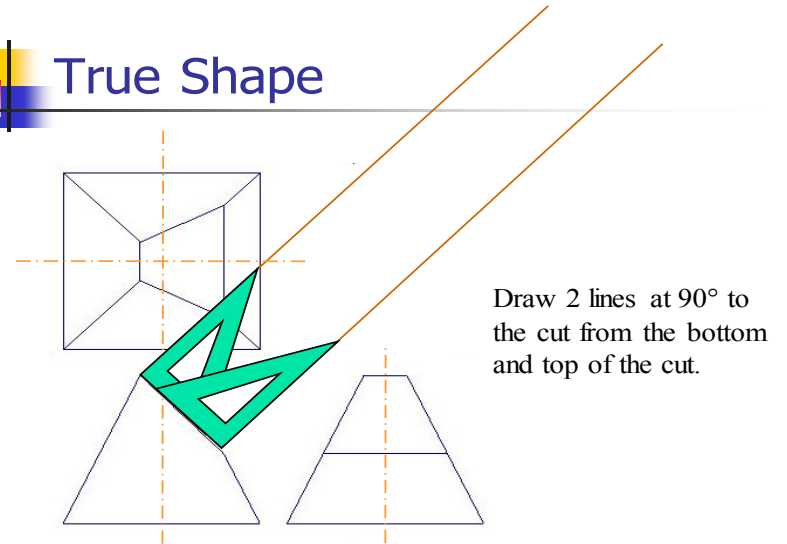

True Shape

Number the corners to stop you getting confused.

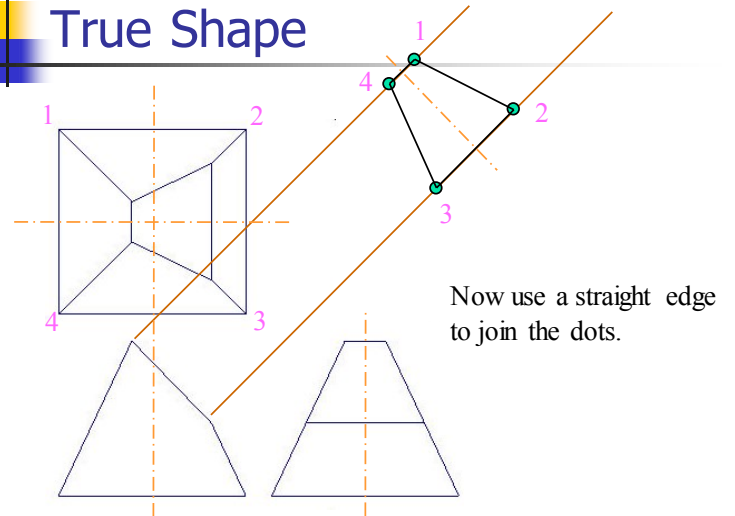

Use a compass to transport the distances from the centre line to the corners. Distances from the centre line to corner 2 and corner 3 are the same so can be marked on at the same time.

True Shape

Draw 2 lines at 90° to the cut from the bottom and top of the cut.

True Shape

Now use a straight edge to join the dots.
